

Lehigh County Livable Landscapes planning effort to begin

Teresa Mackey, Senior Environmental Planner

This summer the LVPC will collaborate with Lehigh County to develop a Livable Landscapes plan, guiding future park, recreation, open space and agricultural land efforts within the County.

The focus of the plan will be on environmentally-sensitive areas, farmland, trails, outdoor recreation, historic and cultural areas, economic benefits and the overall quality of life within Lehigh County. A robust public engagement program will be accomplished for the project. A vision for Lehigh County's open space network will be created that will define the desired future to be accomplished through the plan's goals, policies and recommended actions. The plan will be completed by summer 2017.

The project is being funded by the County and a grant from the Department of Conservation and Natural Resources. For more information on this project, contact Geoff Reese at (610) 264-4544.
